🔗 Portfolio

## Objective

---

Results-driven Software Engineer with 6 years of experience in backend development, including 2 years of freelance projects. Skilled in designing and optimizing scalable, secure, and high-performance applications using modern technologies such as PHP, Laravel, and MySQL. Adept at tackling complex backend challenges, improving system architecture, and delivering impactful software solutions. Seeking to contribute expertise and innovation to a forward-thinking team while continuing to grow professionally.

## Professional Experience

---

11/2024 – present  
Cairo, Egypt

### Robusta Technology Group [🔗](#)

Backend Developer - Full time

- **Developed** and maintained scalable Laravel applications, leveraging Spatie packages (permissions, activity log) and **Filament** to build efficient admin dashboards and backend systems.
- **Designed** and optimized relational databases (MySQL/PostgreSQL), creating well-structured schemas and writing complex queries for improved performance.
- **Conducted** code reviews to ensure adherence to Laravel best practices, proper use of Spatie packages, and secure, maintainable code.
- **Reviewed** code to ensure consistency, quality, and adherence to best practices.
- **Collaborated** with the **DevOps team** to streamline deployments using Laravel Forge/Envoyer and troubleshoot server-side issues.
- **Built** RESTful APIs with Laravel Sanctum/Passport for secure integration with frontend apps and third-party services.
- **Created** custom Filament components and dashboards to enhance internal tooling and user experience.
- **Supported** team growth by mentoring junior developers on Laravel, Eloquent optimization, and package integration.

07/2024 – 11/2024  
Kuwait

### Almasa

Backend Developer - Part Time

As the backend team leader, I directed the development of a scalable internal e-commerce platform using domain-oriented architecture. I led the team in creating essential features, optimizing performance, and integrating payment systems seamlessly.

- **Led** the backend team in developing an internal e-commerce dashboard and mobile app API using laravel.
- **Implemented** domain-oriented architecture to enhance system scalability and maintainability Developed API features, including real-time chat functionality, to enhance user interaction and engagement.
- **Integrated** SadadPay payment gateway for secure and efficient payment processing.
- **Implemented** a notification system to streamline communication and improve user experience.
- **Ensured** scalability, security, and performance optimization for the company's internal e-commerce product.

01/2022 – 01/2024  
Al Dakahlia, Egypt

### Codebase-tech [🔗](#)

Backend Developer - Full time

Over a two-year period, I contributed to the entire software development lifecycle (SDLC) of multiple complex projects, from architecture design to deployment, with a focus on backend development using PHP/Laravel and MySQL.

- **Designed** scalable, secure, and high-performance systems.
- **Integrated** third-party APIs and optimized databases for high-traffic efficiency.
- **Resolved** performance bottlenecks and managed complex system integrations.
- **Collaborated** with cross-functional teams to deliver reliable, on-time solutions.
- **Contributed** to technical decision-making for maintainable and efficient architectures.

09/2021 – 12/2021  
Al Dakahlia, Egypt

### Waitbuzz [🔗](#)

Backend Developer - Internship

- **Contributed** to backend architecture design, ensuring seamless functionality and scalability.
- **Optimized** performance throughout the development lifecycle to meet production standards.
- **Collaborated** closely with senior developers to refine skills and deliver high-quality, production-ready solutions.

## Education

---

07/2019 – 07/2023  
Mansoura, Egypt

### Bachelor of Computer Technology and Commercial Sciences

Nile Higher Institute

## Awards

---
